

Active Holder for GPS

Charging for your GPS

More and more people use GPS devices. Keep your device in an active holder from Brodit and you will always have a freshly charged battery.

There are active holders for various demands, from standard active holders with charging cable to more advanced solutions for fixed installation.

When you put the device in the holder, it is automatically connected to the charging device. 12/24 Volt.

The holders with charging cable connect to the vehicle's cigarette lighter socket.

The holders for fixed installation are connected behind the dashboard, this gives a neat installation without cables hanging over the interior.

The holders come with a tilt swivel and can be adjusted in order to avoid light reflection. Attach onto the ProClip Mounting Platform.

Active Holder With Cigarette Lighter Plug
