

Passive Holder for PDA

Within easy reach

The passive holder is the choice for you who want to have your PDA safely installed in the vehicle. It is easy to put the PDA in the holder, and to take it out of the holder. You can connect e.g. a charging cable to the PDA when it is in the holder.

The holder is designed with a tilt swivel, this means that you can adjust the PDA in order to avoid reflections in the display.

The PDA holders have a perfect fit and holds the PDA firmly in place. Attach the holder onto a ProClip Mounting Platform in your vehicle and you'll have your PDA in easy reach -safe and convenient.
